

Assignment – 6

Summary:

In today's class, the instructor introduced us to the world of Bootstrap, a game-changing framework for web development. We learned the ropes of utilizing Bootstrap, gaining insights into its user-friendly features that streamline the design process. The session delved into crucial aspects such as breakpoints, helping us grasp how to create responsive designs catering to various device sizes.

A major highlight was the exploration of Bootstrap's grid system, providing a structured approach to organizing content with ease. Additionally, we got hands-on experience creating forms, witnessing firsthand how Bootstrap simplifies form development. This practical session enhanced our understanding, making Bootstrap a valuable tool in our web development toolkit.

Output:
